

Muhammad Armaghan

Backend Developer & DevOps Engineer

+92-306-9779370 | me@armaghan.site | github.com/muhammadarmaghan | linkedin.com/in/armaghan06 | Islamabad, Pakistan

SUMMARY

Backend & DevOps Engineer with 5 years of experience designing Node.js/TypeScript backend services and owning their full deployment lifecycle — CI/CD (GitHub Actions), containerized deployments on AWS (ECS Fargate, ECR, RDS, S3), and infrastructure automation across multi-cloud and on-prem environments (GCP, Azure, bare-metal). Hands-on with disaster recovery, backup automation, and secrets management. AWS Certified Cloud Practitioner.

TECHNICAL SKILLS

Languages & Runtimes: JavaScript, TypeScript, Node.js

Backend & APIs: Express.js, REST API Design

Databases: MySQL, PostgreSQL, MongoDB, ClickHouse, Redis, Elasticsearch

DevOps & Cloud: Docker, Kubernetes (k3s), GitHub Actions (CI/CD), Nginx, PM2, AWS (ECS/Fargate, ECR, S3, RDS, IAM, Cognito, ALB, EC2), Google Cloud, Azure, Bare-metal/VMware

Observability & Analytics: ELK Stack, Apache Superset

Specialized: Disaster Recovery & Backup Automation, Secrets/Credential Rotation, DNS Security (DNSdist, KnotDNS)

CERTIFICATIONS

- AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

MernIT Solutions — Backend Developer & DevOps Engineer

Aug 2023 – Present

Islamabad, Pakistan | Project: Occy — an ATS / recruiting SaaS platform

- Develop and maintain OccyAPI, the Node.js/TypeScript + MySQL backend for Occy, one of ~10 services running on AWS ECS Fargate across 5 environments (dev/stage/demo/beta/prod).
- Designed and built an automated ClickHouse backup & disaster-recovery pipeline (Altinity clickhouse-backup → S3) across dev/demo/prod, with tiered retention (7/14/30 days) and prod running daily full + 6-hourly incremental backups; authored the full operator/DR runbook.
- Recovered a production PostgreSQL/RDS analytics incident via snapshot restore and pg_dump/pg_restore migration, then hardened the environment — rotated credentials, disabled public RDS access, and tightened security groups.
- Designed an identity-based canary deployment system (AWS Cognito groups + ALB cookie-routing + a dedicated ECS cluster) wired into GitHub Actions CI/CD (build → ECR → deploy), enabling risk-free progressive rollouts to real users.
- Built and operate a ~35-day, 4-stage credential-rotation program covering 25+ secrets, with a scripted rotate → deploy → smoke-test → revoke workflow.

IotaScale Pvt Ltd — Full Stack Developer / DevOps Engineer

June 2022 – July 2023

Islamabad, Pakistan

- Built REST APIs and DNS-query storage pipelines for **Atrios**, a DNS-based content-filtering/security product for ISPs and telcos, including role-based auth with admin-verified signup.
- Built backend APIs for **Firefly** (URL-crawling/filtering pipeline with a dynamic resource-allocation algorithm, integrated with Go services) and **Octane** (DPI-integrated URL/IP/VPN filtering with Sandvine, plus licensing and role-based login).
- Provisioned and maintained dev/prod environments across Google Cloud, VMware on-prem, and bare-metal servers using Kubernetes (k3s) and Docker.

Meridian Software Technology Park — Software Engineer (Node.js)

Sept 2021 – May 2022

- Built backend APIs in Node.js for a large-scale Power BI reporting platform.

PROJECTS

Twitter Sentiment Analysis (Final Year Project)

Feb 2020 – Aug 2020

Full-stack sentiment-analysis web app (React, Node.js, MongoDB, Kafka) for analyzing Twitter trends at scale.

EDUCATION

International Islamic University, Islamabad

2016 – 2020

BS Software Engineering — CGPA 3.23/4.0
